KS1 Children Enjoying LEGO Club with Miss Critchlow

LEGO Club is always a highlight of the week for KS1 children! There's something magical about seeing little hands carefully clicking bricks together to create everything from towering castles to speedy race cars.

At LEGO Club, children get the chance to use their imagination, problem-solving skills, and teamwork while having lots of fun. Some like to follow instructions to build amazing sets, while others enjoy creating their own unique designs. There's no right or wrong- just endless possibilities!

One of the best things about LEGO Club is how it helps children grow. They develop fine motor skills, patience, and even basic engineering skills without even realising it. Plus, working together on group builds teaches them how to share ideas and take turns.

Most importantly, LEGO Club is a place where children can feel proud of what they create. Seeing their excitement when they show off their finished models is priceless!

If your child loves building and using their imagination, LEGO Club is the perfect way for them to learn, play, and make new friends.
